

BINGO-O!

NONNOMINATIONAL HOLIDAY HANDBAG O-BING

BINGO-O! is a game of luck, accuracy, and memorization!

BINGO-O! is a fascinating game of strategy in which a player can conquer a single row or column!

1. Make bingo cards on full size sheets of paper – enough for each guest. All squares will be left blank except for the center BING FAITH-FREE square. Also, cut up some small squares of paper. You'll need 2,000 or more (depending on how many guests you have). Give 1 bingo card and 24 squares of paper to each of your guests.
2. Hide the extra squares of paper in the jacket pockets of your guests.
3. Bring in 24 people and put them in rows and columns, like you would a giant BINGO card - 5 rows and 5 columns, leaving the one space right in the middle vacant, for your BING FAITH-FREE square.

("But Mr. Faithful, what if I don't have 24 people who will do this?" In this game, please feel free to substitute the people with statues. If you don't have statues use bistro tables, barbeque grills, leashed-cats, or anything! Be Creative! The possibilities are endless!)

4. Number each person (or item) on the human BINGO-O! board the number that corresponds with that natural position on a real BINGO-O! card. (Please refer to the sample BINGO-O! card, below.)
5. Have each guest at the party fill his or her handbag, briefcase or backpack with water or **Bing Faithful's Delicious Holiday Eggnog** (Page 6 of *Bing Faithful's Very Merry Nondenominational Holiday Recipes Booklet* on the Activities page of the website www.BingFaithful.com), and stand at least 10 feet from the human BINGO-O! board.
6. When everyone's cards are ready and all bags are full, each person must – one at a time – throw his or her bag at a person on the human BINGO-O! board. The person on the human BINGO-O! board forcibly knocked over by the full bag is removed from the human BINGO-O board.
7. As each human BINGO-O! position is eliminated, everyone playing the game of BINGO-O! covers the number on his or her board that matches the number eliminated from the human BINGO-O! board!
8. First person with an empty row wins!

NOTES FROM BING FAITHFUL:

- Refill the bags as needed.
- Pay Attention! You may throw your bag at someone who was already knocked off the board, and if you successfully knock over someone off the board you bring that person back on the board & reconstitute his or her original number and position on the board. So, if you can remember who stood where on the board and can hit the right person, you can put them back on the board and block someone else from winning the game!

BING'S SPECIAL NOTE TO THE HUMAN BINGO-O! PIECES

Cover your chestnuts.
